

HELP PREVENT AUTO THEFT

Steering wheel locks are difficult to defeat and provide a strong visual deterrent to alert potential thieves that your car is protected. The Medfield Community Association is working with the manufacturer of name brand steering wheel locks to offer the locks at a substantial discount as part of our yearly membership drive. The steering wheel locks will be offered as part of Medfield membership drive for Medfield Community Association members.

Two models are being offered...one that fits most cars, and one that fits most cars, trucks, and SUVs. The locks are priced at \$15 each, a savings of approximately 50% off the retail price. Auto-theft has remained a persistent and challenging problem in Baltimore. Citizens should seriously consider taking advantage of the opportunity to purchase this easy to use and sensible deterrent.

You can order these with the form below or at the meeting.
